

*Compare Bertram with any other boat...
and you'll know why Bertram is*

THE BOAT THE EXPERTS ARE BUYING!

① **EXCLUSIVE FULL LENGTH V HULL** gives a softer ride in head seas, rolls less in a beam sea, holds course in a following sea. Runs evenly to pivot, bow raises less than 4", will not nosedive and plow when throttle is cut. Less drag means greater efficiency—achieves speeds never before possible for a similarly hull. Holds in perfect balance in sharp high-speed turns with no sliding.

② **LONGITUDINAL STEPS** help develop lift for planing, act as bilge keel to prevent slideslip on turns. Serve as multiple spray strips, throwing water out flat to strip it from blowing back ahead.

③ **CHINES ABOVE WATER**, where they can't dig in to inhibit low-speed turning, rise well clear of water in high-speed turns to prevent tripping, contribute to dryness aft.

④ **HIGH IMPACT FIBERGLASS HULL** molded in one piece has no seams to open, slough off blows and damage, will not soak up water, gas, or oil. Less depreciation, lower insurance, greater resale value.

Maintenance is greatly reduced, as rot or marine borers. Permits new beauty through freedom of working, provides greater interior space by eliminating frames, clamps, shelves. Most easily repaired in unlikely event of damage.

⑤ **DIAMOND SMOOTH GEL COAT** provides even, color-integrated finish unequalled in the industry. Resists stains, easily cleaned because of high gloss.

⑥ **FIBERGLASS CABIN TOPS AND DECKS** are single units with no seams, stand up to weather. Normally maintained with washing and, if desired, occasional waxing.

⑦ **MOLDED FIBERGLASS FUEL TANKS** will not rust, chafe, or seep. No wires, pipes, or solder joints to leak. No galvanic action to produce gum, clog vent, breather and fuel lines. Fiberglass is an insulator, reducing condensation due to temperature changes. 180 gal. capacity.

⑧ **COPPER STRIP MOLDED IN HULL** provides optimum ground for mechanical installations, engines, through-

hull fittings, and fuel filler pipes. Prevents sparking, eliminates electrolysis problems, provides proper ground for electrical circuits and electronic equipment.

- 5 **COLOR CODED WIRING** is dependable, long lived, easy to identify and repair. Twisted in loops to reduce electronic interference.
- 10 **CIRCUIT BREAKERS** replace old-fashioned fuse boxes for safety and convenience.
- 11 **MONEL SHAFTS** are stronger, less subject to breaking, bending, twisting under torque. Great corrosion resistance, less wear on bearings.
- 12 **CHRYSLER M412 280-HP** engine provides 30 MPH-plus cruising speeds without pushing engines over 30% maximum RPM, ensuring longer life and better fuel economy. Rubber-mounted and sound insulated for low vibration. World-wide parts and service.
- 13 **ALTERNATORS** charge batteries faster, charge at low idling speeds, keep batteries charged.
- 14 **DOUBLE CLAMPED HOSE CONNECTIONS** of stainless steel below water line give double protection.
- 15 **RIG TYPE STEERING** with worm gears, smoothest, easiest, most dependable yet. No cables to wear, slack on or break.
- 16 **STURDY 1 1/2" RUB RAILS** act as bumpers, withstand shocks that lesser ordinary wood rails in splinters.
- 17 **DUAL 12-VOLT BATTERIES** connected in vaporproof switches permit selection of either or both batteries for starting engines with no danger of sparking. Fiberglass battery trays with trough, impervious to acids, prevent damage in event of spillage.
- 18 **WRAP-AROUND WINDSHIELD** is both beautiful and practical, providing excellent stability. Framing is free from warping and swelling, provides rigid cabin top support. Windows open for ventilation.
- 19 **FORMICA AND VINYL** interiors are attractive, durable, practical. No staining and scratching, wipe clean with damp cloth. No exposed structural fiberglass—interiors completely finished with ceiling, headliner.
- 20 **BERKHAM DESIGNED FITTINGS** such as ingenious bow clock with lights built in. All Berkham hardware tested in bedding compound to assure water tightness.
- 21 **6" BERTHS** generously sealed for maximum sleeping comfort. Foam seating.
- 22 **FIBERGLASS AND FORMICA GALLEY** has ice chest, sink, and generous storage. Ample water capacity.
- 23 **BUILT-IN DRAWERS** and hanging lockers utilize every inch of usable space to provide storage essential to cruising comfort.
- 24 **COCKPIT COMPARTMENTS** provide convenient storage throughout boat.
- 25 **LARGE FUEL FILLER** and vents to fuel tank permit fast fueling. Cockpit retaining buntline of fuel filler draws spillage overhead, not into boat.
- 26 **LARGE FORWARD HATCH** made of fiberglass, water-tight, sturdily secured with stainless hinges.
- 27 **ENCLOSED WALK-ON-HEAD** with easily, linen storage. All fiberglass and vinyl for easy cleaning.
- 28 **FLYING BRIDGE** of fiberglass molded integrally with cabin top. No joints to work or leak.
- 29 **RACING TYPE** hulls give more positive control at high or low speeds.

DIVISION OF HALLICORP

NEW BERTRAM 31 FLYING BRIDGE CRUISER

Give us the best of custom-built design, plus all the advantages of flying bridge and اسپریم-ویلد! At last—a sport fishermen type boat with extra comfort and facilities for cruising! The enclosed cabin has dinette, galley, and private walk-in head. Sleeping accommodations for four in two cabins. Flying bridge gives finest possible visibility for ease of control.

Combined with the famed Bertram full-length V hull and Bertram's exclusive High-Impact Fiberglass manufacturing process, the Bertram 31 Flying Bridge Cruiser gives you new dimensions of comfort, performance, and value.

NEW BERTRAM 25 FOUR-SLEEPER EXPRESS NOW AVAILABLE

After 28 months of research and development, the Bertram Yacht Company expands still further its 25 line. To the same Bertram full-length V hull that won this year's Miami-Norfolk race it now adds a fully enclosed cabin with cruising accommodations for four. Accommodations include four separate berths, dinette, galley with ice chest, and enclosed stand-up head to equip the new Bertram 25 Express for easy-going family cruising. New MacCracker outdrive with quiet underwater jet prop exhaust provides more efficient propulsion and kick-up protection.

... and raising soon:

NEW BERTRAM 38 TO ESTABLISH NEW STANDARD OF EXCELLENCE

For the first time, the superb performance of the Bertram full-length V hull will be combined with the luxury and اسپریم-ویلد of a larger boat in the beautiful new Bertram 38 to be introduced at the New York Boat Show.

Your dealer will be happy to show advance plans and information about this distinguished fiberglass boat and accept deposits.

For name of your nearest dealer and information on any of the above boats write Bertram Yacht Company, Department Y-8, 3063 N.W. 21st Street, Miami, Fla. Phone NE 3-8011.
