

# NEW **MOPPIE**<sup>1</sup> BRINGS YOU BIG-BERTRAM PERFORMANCE AT A SMALL-BOAT PRICE!

## Another revolution in boating from Bertram!

If you're amazed by Bertram performance (and who isn't?) but have not wished to make a big-boat investment, here is the greatest news to boating this year!

You can own the brilliant new 20-ft. *Moppie*<sup>1</sup> by Bertram for as little as \$4,890\*!

You get a sleek 150-HP Mercruiser sterndrive engine as standard, for exciting performance—speeds over 35 MPH!

You get sporty, foam cushioned bucket seats in smart two-tone, heavy-duty vinyl. A king-size cockpit for cruising, fishing, or water-skiing fun. Built-in foam flotation. And Bertram's famous High Impact fiberglass that takes all the punishment that winning off-shore racing can dish out and returns maintenance-free, way down.

Above all, you get Bertram's exclusive and patented Ray Hunt designed deep-V hull...the one that won all the races. This is the hull that takes seas in stride, smooths out rough going, turns and banks in perfect balance. While she handles with superlative ease, her performance will never lose its thrill.

Here is the boat built to take the punch out of pounding, keeping you remarkably dry and comfortable. Here is the boat with kick-up sterndrive for steady water fishing...or one that can accelerate quickly to a high-speed plane for

towing a squad of water skiers. And this is the Bertram that you can put on a trailer and go!

If you've dreamed of Bertram boating, but have been waiting for a more compact version at a more compact price, see the *Moppie*<sup>1</sup> on display at dealers listed on page 86. Watch your local paper for announcement date, or phone your dealer. Or write us for information.
