

Underway at last!

*The Bertram International 56'.
An outstanding contribution to the 1968 yachting
scene and a major achievement of
international yacht design and production.*

Big, beautiful, fast, able and luxurious. This all fiberglass Open Top hull is 55' overall with an ample beam of 16'4" and draft of 4". For all her 'offshore' capabilities this is one of the most handsomely finished hulls we have ever seen. Three staterooms below for Owner, Guests or Crew. All electric galley, air conditioning, full carpeting and cabin joinerwork and detailing in Burma Teak give beautiful harmony to the some 20,000 man hours that went into her construction. Twin Caterpillar or GM Diesels plus the unique characteristics of the Open Top hull mean unexcelled performance. In the water now for inspection and demonstration.
